

SAM-e (S-Adenosyl Methionine) is naturally produced by your body and helps maintain healthy emotions. Various factors such as diet and aging can cause low levels of SAM-e, leaving you feeling unbalanced and moody. **Doctor's Best SAM-e** helps replenish your SAM-e levels and promote a healthy mood.*

Supplementing with SAM-e

Soloesse® Italian SAM-e is processed to yield the highest available percentage of the active pure S,S form which helps mediate biochemical activity in the human body.*

SAM-e and Mood and Cognitive Function

SAM-e helps facilitate DNA enzymatic actions. These enzymatic actions are required for the healthy conversion of neurotransmitters responsible for healthy emotions, such as serotonin and dopamine. SAM-e also facilitates glutathione usage which improves the body's antioxidant defense and helps maintain acetylcholine levels necessary for cognitive function.*

SAM-e and Joint Function

In clinical trials, SAM-e has been shown to help increase joint comfort and mobility by promoting the synthesis of proteoglycans, essential components of connective tissue.*

SAM-e and Liver Function

SAM-e helps support healthy levels of glutathione, a critical antioxidant which helps protect against free radicals. SAM-e acts as a methyl donor in the synthesis and formation of phosphatidylcholine and L-cysteine, both necessary for maintaining liver health.

Soloesse® is a registered trademark of Gnosis SpA.
