

NATURAL SOURCE

**Suggested Usage:** 1 capsule 1-2 times per day or as directed by a health professional. Keep out of reach of children.

Each capsule contains 400 IU of pure vitamin E in the form of d-alpha tocopheryl succinate, derived and isolated from 100% natural sources. This quick-release dry form is preferred by those who want an alternative to oil-based sources of vitamin E. Capsules can be swallowed or opened and the contents added to foods or beverages.

Vitamin E is a fat-soluble vitamin and an antioxidant that protects cell membranes and prevents free radical damage, supporting the cardiovascular system and general health.\* Vitamin E's ability to protect cell membranes is important for people in polluted environments and those with active lifestyles. Experts recommend daily supplementation of vitamin E as it is difficult to get enough through diet alone.

All Natural Factors products are manufactured in accordance with the Government of Canada's Good Manufacturing Practices (GMP), among the highest standards in the world.
