

Discover the *force* of the Whole™

Clinically studied Grape Seed extract is shown to support heart health.* Grape Seed also supports lean muscle mass in the body, which is important for physical fitness as well as healthy aging.* We use a whole-food approach to deliver a broad spectrum of Grape Seed's beneficial compounds, matching Nature's true profile by extracting the whole seed using traditional methods. We extract a specially selected New Zealand Grape variety that produces extraordinary levels of beneficial plant compounds and phytonutrients. Our full-spectrum process preserves precious plant compounds, delivered in a 100% vegetarian formula from extract to capsule.

Full-Spectrum Extraction: Our Difference

Many companies isolate elements from an herb, concentrate them, and label it "whole herb." New Chapter® delivers the wisdom of *whole food*. Using only supercritical CO₂ or traditional techniques of extraction, our *Force* extracts offer a broad spectrum of beneficial phytonutrients in their natural profile.
