Ultimate Immune System Support[†]

THE METHYLATION CONNECTION

DNA methylation is a normal biochemical process that occurs in the body, important in regulating cell identity and growth.

RM-10[®] ULTRA contains a full range of nutrients that support healthy DNA methylation needed for optimal health.[†] Betaine, vitamin B12 and Folate play a critical role in normal methylation by supporting the body's conversion of homocysteine into methionine, a key donor to cellular methylation.[†]
