

DIRECTIONS: As a dietary supplement for adults, add 2 to 8 drops as needed. Adjust amount and supplement as needed.

* Stevia is used where a sweetening agent is desired without the calories or blood sugar effect. Stevia is 100 times sweeter than sucrose at 10% sucrose concentration. Stevia has no calories. Stevia does not affect blood sugar (no glycemic index) and is safe for those with blood sugar swings, hypoglycemia, hyperglycemia and diabetes. It is added to beverages and other foods to taste. It is an extremely sweet herb, so it should be added slowly until the desired amount of sweetness is achieved. Stevia is safe for children.
