

SUGGESTED USE:[†] Take 1 Serving (2 scoops) with 12 oz of cold water or your favorite beverage.

For a delicious alternative, try blending 1 serving of ISOLATE with 12 oz of non-fat milk. It is important to drink an additional 12 - 20 oz. of water within 1 hour after ingesting a protein drink to aid in digestion.

WHAT IS ISOLATE™?

SNI has scientifically developed the most bio-available protein supplement! ISOLATE contains 100% whey protein isolates provided from Cross Filtered Micronized (CFM) Isolate Whey.[†]

WHY IS ISOLATE™ GOOD FOR ME?

ISOLATE contains up to 60 Grams of protein per serving with high absorption peptide fractions for optimal utilization. Meaning: the protein is in micro particles so your body can absorb 100% of the protein supplement without loss due to digestion.[†]

HOW LONG DOES ISOLATE TAKE TO ENTER MY SYSTEM?

Immediately! The protein is manufactured into such a micro particle that it instantly enters your bloodstream.[†]

WHAT ELSE DOES ISOLATE CONTAIN?

ISOLATE is high in branch chain amino acids and glutamine. These are required for building muscle and burning fat. ISOLATE also contains a natural digestive enzyme to improve digestibility and reduce bloating, commonly associated with protein ingestion.[†]

WHY IS CLA ADDED?

Conjugated Linoleic Acid (CLA) works to block certain enzymes that let fat cells swell. This process helps control our body's weight.[†]

WARNING: KEEP OUT OF REACH OF CHILDREN. Consult a physician before using this product. Store in a cool, dry place 15°-30°C (59°-86°F). Do not use if tamper-evident seal is broken.
