Phosphorus	40mg	8%
Potassium	80mg	13%
Sodium	120mg	6%
GlycoMol™ (Instant Glycogen Loading System)	30g	†
Waxy Maize Starch		†
Aminobol-3™ (Hyper-Anabolic Growth Matrix)	6g	†
L-Leucine		†
L-Isoleucine		†
L-Valine		†
Expand-2™ (Acute Cell-Expanding Complex)	3g	†
Creatine Monohydrate		†
Creatine Ethyl Ester Di-Chloride		†
Hemo-Diffus™ (Immediate Blood Flow Amplifier)	1g	†
Arginine Alpha Ketoglutarate		†
Arginine Ethyl Ester Di-Chloride		†
Not a significant source of dietary fiber, vitamin A and vitamin C.		
**Percent Daily Values are based on a 2,000 calorie diet. † Daily Value not established		

Ingredients: GlycoMol™ (Ultra High-Molecular Weight Long Chain Native Waxy Maize Starch), Aminobol-3™ (L-Leucine, L-Isoleucine, L-Valine), Whey Protein Isolate (L-Glutamic Acid, L-Tryptophan, L-Aspartic Acid, L-Leucine, L-Lysine, L-Threonine, L-Proline, L-Isoleucine, L-Valine, L-Serine, L-Alanine, L-Phenylalanine, L-Tyrosine, L-Cystine, L-Arginine, L-Methinine, L-Glycine, L-Histidine), Expand-2™ (Creatine Monohydrate, Creatine Ethyl Ester Di-Chloride), Hemo-Diffus™ (Arginine Alpha Ketoglutarate, Arginine Ethyl Ester Di-Chloride), Hydro-4™ (Sodium Chloride, Potassium Chloride, Tri-Calcium Phosphate, Magnesium Chloride), Guar/Xanthan Gum, Citric Acid, Artificial Grape Flavor, Pro-Sweet Flavor Masking, Acesulfame Potassium, Sucralose, FD&C Red 40 and Blue #1.

Recommended Use: Mix contents of one packet (46g) into 20oz of water. Consume while working out. For optimum results take frequent sips during your training session and finish entire drink before the end of your workout. THIS PRODUCT IS A WORKOUT FORMULA AND SHOULD BE CONSUMED DURING YOUR TRAINING SESSION.

Store this container tightly closed in a cool dry place. Some settling may occur. Shake container before use.

Warning: If you are a diabetic consult your physician before using this product. Always stay well hydrated throughout the day.

The statements on this label have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease. As individuals vary so will results.

Build Muscle While You Train

Create Anabolism During Exercise

Induce A Hyper-Growth State In The Gym

Grape

Dietary Supplement 15 -1.62 oz (46g) Packets Net Wt. 1.52 lbs (690g)

ANABOLIC WORKOUT FORMULA

Maximizes Your Ability To Build Actual Muscle While You Train When Consumed During Exercise.

Mass XXplosion is a revolutionary product as it is the world's first true workout drink that maximizes anabolism during exercise and actually allows you to build muscle while you train. German researchers have discovered that the best time to supply your muscles with anabolic and growth promoting nutrients is not before or after but during exercise when blood flow to the muscles is at its absolute highest. The human body pumps 15-20 times more blood to your muscles when being exercised. Saturating your blood with precisely timed and readily available anabolic key nutrients during exercise will result in an over-uptake of these nutrients putting your muscles into an instant hyper-growth state. Best of all, you can decide which muscle groups you want to benefit the most by determining which muscle you want to train on any given day.

More Blood Flow, More Nutrients, More Growth: Blood is the transport vehicle that supplies your muscles with everything they need. The more nutrients you can pump into your muscles the more they will grow. In the past athletes were consuming pre- and post workout products designed to take advantage of the effects of training. They know that a freshly trained muscle that is engorged and filled with more blood is ready to utilize extra nutrients. However, by consuming nutrients before or after training they miss out on the best opportunity to feed a muscle with growth promoting compounds when blood flow is actually at its highest during exercise.

Creating Anabolism During Exercise: Training a muscle provides the extra blood flow you need. Now we have to supply this particular muscle with growth promoting nutrients by saturating our blood with specific anabolic agents in their most elemental form: Selected essential and branch chain amino acids, fast-acting glucose and ATP-precursors. This super-saturated blood will rush to your muscle cells at a rate that is 15-20 times higher than normal, instantly inducing anabolism and glycogen super-loading. The result is extreme cell volumization and prevention of catabolism which puts your muscle into an immediate state of hyper-growth.

Incredible Results: The unique workout formula of Mass XXplosion fills all these requirements and results in amazing gains. When consumed during exercise this breakthrough product facilitates extraordinary muscle growth that would otherwise not be possible with regular pre- and post workout formulas.
