FOR LIFE BALANCE™

NAC

N-acetyl cysteine

600 mg

- With Selenium & Molybdenum
- Maintains Cellular Health*

10% of profits donated for health research

100 Capsules

A Dietary Supplement

SUGGESTED USAGE: As a dietary supplement, take 1 capsule 2 times a day. Dosage may be increased, under the supervision of a health care practitioner.

N-Acetyl Cysteine (NAC) is a stable form of the non-essential amino acid L-Cysteine. It is a sulfur-containing amino acid that acts as a stabilizer for the formation of protein structures, and is also necessary for the formation of glutathione.* Molybdenum and Selenium are essential trace minerals that facilitate the production of several important enzymes.

*These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, cure or prevent any disease.

Do Not Eat Freshness Packet. Keep in Bottle.

Store in a cool, dry place. Please Recycle.

CODE P0085 [V2]

N-acetyl-cysteine (NAC) comes from the sulfur-containing amino acid cysteine, and makes up part of the tripeptide glutathione. Glutathione, along with NAC, are powerful antioxidants. Antioxidants neutralize free radicals, which may damage the body's cells. NAC supplementation can help to increase levels of glutathione in the body.*

This unique formula also contains Molybdenum, an essential trace element that functions as a cofactor in many biochemical reactions, and Selenium, another trace mineral that supports glutathione production.*

Cautious and Interactions
Because NAC may help to maintain homocysteine levels within the healthy range, it may support a healthy vascular system.*

Cysteine supplements should not be taken by individuals with cystinuria, a kidney condition in which excessive amounts of cysteine (along with three other amino acids) are lost in the urine.

NAC may interact with many pharmaceutical medications including ACE inhibitors (medications commonly used to treat high blood pressure) and immunosuppressive medications (azathioprine, cyclophosphamide, prednisone, or prednisone). In addition, although NAC may interact with nitroglycerin and isosorbide (two medications commonly used to treat chest pain), this combination may also increase the risk of side effects such as severe headaches and may lead to abnormally low blood pressure.*

Laboratory and animal studies have suggested that NAC may affect the body's metabolism of both clozapine and dextrothionin.*

Guaranteed Quality

This is an FDA-regulated dietary supplement that is produced in an FDA- and third party-inspected facility. We are certified for producing dietary supplements and USDA Organic products using Good Manufacturing Practices (GMP). All ingredients are quality tested to meet or exceed specifications. Our quality team goes above and beyond standard quality control to ensure the safety and efficacy of this supplement. We utilize advanced analytical and microbiological testing methods, with capabilities that are state-of-the-art and exceed basic lab requirements.
